PROFESSIONAL SUMMARY

B.Tech Artificial Intelligence and Data Science student (CGPA 8.12) with hands-on experience building full stack web applications using the MERN stack, Firebase, and Python-based machine learning models. Skilled in frontend development, REST API integration, and UI/UX design, with practical exposure to system architecture and CRUD-based application development through internships and self-driven projects. Seeking to grow as a Full Stack AI Engineer in a collaborative, innovation-driven environment.

TECHNICAL SKILLS

- Languages & Frameworks: JavaScript, Python, HTML5, CSS3, React.js, Node.js, Express.js
- Databases & Tools: MongoDB, Firebase (Realtime Database, Authentication), Git, GitHub, VS Code
- AI & Data Science: Machine Learning fundamentals, Logistic Regression, Data Cleaning & Analysis, Predictive Modeling
- Other: REST API Integration, UI/UX Design, Responsive Web Design, System Architecture & Low-Level Design (LLD)

CORE STRENGTHS

- Team Collaboration — Experienced working in cross-functional teams during hackathons and internships.
- Adaptability — Quick to learn new tools, frameworks, and domains (e.g., hardware integration, AI/ML).
- Problem Solving — Strong analytical approach to debugging, system design, and data-driven decision making.
- Communication — Comfortable presenting technical work and collaborating with non-technical stakeholders.
- Time Management — Consistently delivers projects under tight deadlines, including hackathon environments.

INTERNSHIP EXPERIENCE

Full Stack Developer (MERN Stack Intern) | Unified Mentor

2025

- Built and integrated real-time database functionality and CRUD operations using Firebase for modular web applications.
- Applied system architecture and Low-Level Design (LLD) principles to design scalable, maintainable application modules.

Frontend Developer (Web Development Intern) | Cognifz

2025

- Developed responsive, mobile-first web interfaces using HTML, CSS, and JavaScript.
- Strengthened UI/UX design skills and resolved cross-browser compatibility issues to improve user experience.

PROJECTS

Disaster Response Drone for Remote Areas | Hardware + Software Integration Project

- Designed and built a disaster response drone combining hardware components (flight controller, sensors, and communication modules) with custom software for navigation and monitoring.
- Engineered the system to support relief operations in remote, disaster-affected regions by enabling real-time data collection and communication where traditional access is limited.

Linkova — Professional Networking Platform | Individual Project | Full Stack Development

- Built a LinkedIn-inspired professional networking platform using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented secure user authentication and interactive social features including likes and comments.

Predictive Analysis System | Individual Project | Machine Learning

- Developed and evaluated machine learning models in Python using logistic regression to generate predictive outcomes.
- Performed data cleaning and pattern analysis to improve model accuracy.

Farmer Government Aided Schemes Portal | Individual Project | Agriculture / Web Development

- Designed a web application providing farmers access to government scheme details and crop information.
- Built using HTML, CSS, JavaScript, and Firebase for real-time data management.

RELEVANT COURSEWORK

- Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems
- Operating Systems, Computer Networks, Machine Learning, Web Technologies

EDUCATION

B.Tech, Artificial Intelligence and Data Science | M. Kumarasamy College of Engineering 2024 – 2028

- Current CGPA: 8.12 (through 3rd Semester)

Higher Secondary & Secondary Education | Lourde Matha Convent Matric Hr. Sec. School 2022 – 2024

- 12th Standard: 84% | 10th Standard: 76%

CERTIFICATIONS

- NPTEL Certification — IoT for Industries (2025)
- NPTEL Certification — Disaster Management and Climate Hazards (2025)
- JLPT N5 Examination — Grade A (2026)

ACHIEVEMENTS & CO-CURRICULAR ACTIVITIES

- Participated in multiple college-level and external hackathons, developing AI and web-based solutions under tight deadlines.
- Served as Campus Ambassador for Eduveda Academy, promoting technical learning opportunities among students.

ADDITIONAL INFORMATION

- Languages: English (Read, Write, Speak), Japanese (Read, Write, Speak)
- Areas of Interest: Full Stack Development, Artificial Intelligence, Data Science, UI/UX Design
- Hobbies & Interests: Vibe Coding, Reading, Music

DECLARATION

I hereby declare that the information provided above is true and accurate to the best of my knowledge.
